

South Fork Cottonwood Creek Watershed Improvements (Idaho CD)

Program	Cropland Erosion Control
Lead Implementer	Idaho County Conservation District
Funders	Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, Private Party
Project Primary Contact	Stefanie Hays (stefanie.hays@id.nacdn.net)
Project Stage	Completed
Duration	2001 - 2007

Agricultural Projects & Practices > Cropland Erosion Control

The South Fork of Cottonwood Creek watershed encompasses approximately 12,629 acres. A majority of the land within the South Fork Cottonwood Creek watershed is in agricultural production and is privately owned. The goal of the implementation project is to mitigate the effects of sediment, nutrients, pathogens and temperature on the waters of the South Fork of Cottonwood Creek in order to restore the designated beneficial uses.

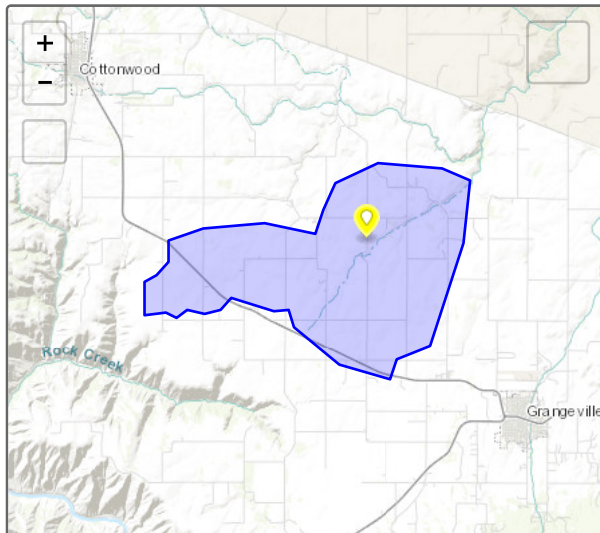

Key Accomplishments

- Nutrient Management (acres): **6,658.00 acres**
- Nutrient Management (number): **13**
- Pasture & Hayland Planting (acres): **65.00 acres**
- Residue Management, Direct Seed (acres): **5,430.00 acres**
- Residue Management; No Till & Strip Till (acres): **1,068.00 acres**

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
